New Rejections and Objections

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

regards as the invention. Claim 2 recites the limitation "formula (I)" in line 3. This limitation is undefined and claim 2 is therefore rendered indefinite.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claims 5 and 6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 5 recites the limitation "discharge conduit" in line 2. This limitation does not find support in the specification as filed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Stelman (US 5,308,366 05-1994). Stelman discloses (Figure I, bottom) a reactor with a ball valve which corresponds to the instantly claimed apparatus. A new intended use of

the apparatus does not impart patentability to a known apparatus. Stelman therefore anticipates claims 1 and 2.

Claim Objections

10. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 2 limits only the intended use of the claimed apparatus and not the apparatus itself. Claim 2 is more properly dependent from a process claim.
11. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Allowable Subject Matter

12. Claim 4 is allowed. Claim 3 is drawn to allowable subject matter. The following is a statement of reasons for the indication of allowable subject matter: Stelman (US 5,308,366 05-1994), the closest prior art, neither discloses nor fairly suggests that his apparatus be employed in a process for the synthesis of hydroxyalkyl(meth)acrylate. The instantly claimed processes are therefore patentable over the teaching of Stelman, the closest prior art.

Conclusion

13. Claims 1-6 are pending. Claims 1, 2, 5 and 6 are finally rejected. Claim 3 is objected to. Claim 4 is allowed.
